- CompTIA Project + PK0-005 Course Outline

## Target Audience & Job Roles:

- Junior IT project manager
- Project coordinator
- QA leads
- SCRUM masters
- Development leads
- Product owners
- Level II help desk technicians
- Associate / business analysts
- Project control analysts
- (PMO team members)

## Course Objectives

- CompTIA Project+ gives IT professionals hands-on project management skills to coordinate small- to medium-sized projects using waterfall and agile methodologies.
- CompTIA Project+ is ideal for IT pros who need to manage less complex projects as part of their other job duties. Project+ is demanded by employers because it covers how to manage a project lifecycle by identifying and managing risk, establishing a communication plan, managing resources, and stakeholders, and maintaining project documentation.
- This course is for IT professionals preparing to take the CompTIA Project + certification exam PK0-005.

## Technical Areas Covered:

- Project Management Basics & Concepts
- Project Life Cycle Phases
- Tools and Documentation
- Basics of IT and Governance
- Project Constraints
- Communication and Change Management
- Project Tools and Documentation

## Project + Course Benefits:

- Successful candidate has knowledge and skills required to manage the project life cycle, ensure appropriate communication, manage resources and stakeholders, and maintain project documentation. This candidate will also have the ability to support the completion of larger projects.
- Project+ covers a high-level introduction to Agile. If an individual would like to focus on Scrum, he/she would take Scrum Alliance's Certified Scrum Master certification.
- The skills and knowledge measured by this examination were derived from an industry-wide job task analysis and validated through an industry-wide survey. The results of this survey were used in weighing the domains and ensuring that the weighting is representative of the relative importance of the content.
